

PA Cyber Charter School Information

As always, do your own research. This is just a helpful guide to get you started. It's easy to feel overwhelmed when it comes to your child's education. We're here to help. At the end of the day, we all just want what's best for our kids. Just remember YOU CAN DO THIS.

Cyber Charter Schools are independently run, but funded with money from the school district where the child resides. They are essentially taking money away from the very district that isn't serving your child or your family well.

You do not pay anything. You will receive a computer, printer, books/materials, an ISP rebate check & in some cases free printer ink. You must have an active internet connection available.

Below is a list of 4 of the most popular Cyber Charter Schools in PA, plus 1 for PA placement. Take time to research each one to see which is the best fit for your family. Enrolling is easy. Vax exemptions are available. Younger children will require more attention, while older children can work independently. Assume that for the first quarter, your child will be expected to come to the virtual classes daily for attendance...this is referred to as a synchronous learning path. A little farther on in the school year, your student will most likely have an opportunity to apply for the asynchronous learning path (working independently without attending daily class) as long as grades, attendance & attitude are satisfactory.
